Fabrics

Always cut your main Body fabric **Larger than the hoop** you have chosen e.g. for a 8 x 12 hoop cut your fabric 8.5 x 12.5

Always cut your body parts fabric **Larger than the Placement Stitch outline** by about ½ inch (1.5 cm) to allow for placement error and seam allowance.

- Body – (2 pieces) low pile Minky/Cotton/Rose or Fleece
- Limbs – (2 pieces) low pile Minky/Cotton or Fleece
- Ears (if applicable) – (2 pieces) – 1 Piece Outer Ear - low pile Minky or Fleece and 1 Piece Inner Ear – Cotton
- Tail (if applicable) – (2 pieces) low pile Minky/Cotton/Rose or Fleece
- Face – (1 piece) Wool Felt. (Craft felt/poly blends will pill!) You can also use Fleece if it needs to be machine washable.
- Nose – (1 piece) Wool felt.
- Tummy – (1 piece) Cotton backed with Heat n Bond Lite to prevent fraying. **Optional** - iron/fuse the cotton/heatnbond piece to 1 piece of craft Felt for more stability. *(If using the diamond stitch you will not need the Heat n Bond backing).*

Supplies

Tearaway stabilizer
Stuffing (polyfil, wool etc.),
Stuffing tool such as an old paint brush,
Needle & sewing thread (for hand sewing),
Scissors or rotary cutter
Safe cutting surface
Tape – (e.g. Painter tape) to keep your limbs in place

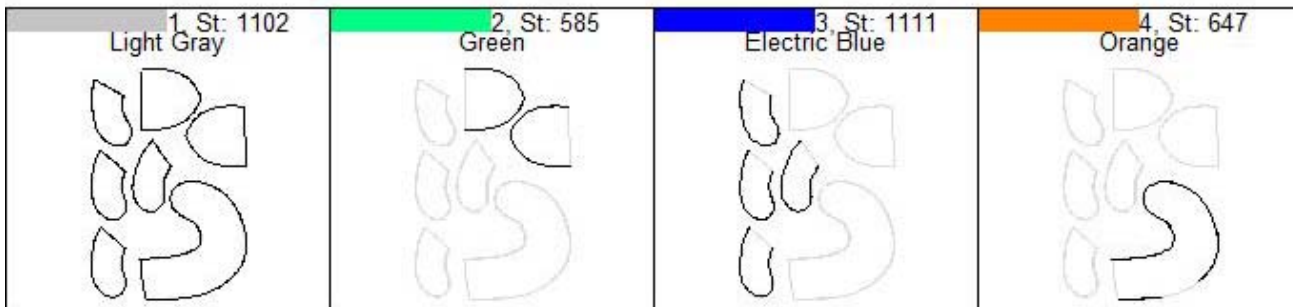

TIP: *If you use thick or loopy fabrics use Water Soluble stabilizer to stop your embroidery foot getting caught!*

Embroidery:

This is a Multi Hooping project.

The **Limbs, Ears, Tail**, should be **done before** the main **Body**.

Limbs, Tail & Ears

Placement Stitch Outline is a line (Step 1 here) stitched onto your stabilizer so you know where to place your fabric. It can be done in any color as you will not see it on the finished product.

TIP: After each Step gets stitched together, Always check that the fabric does not overlap the Placement Lines for other parts of the design. If it does trim it.

1. Hoop stabilizer.
2. Stitch Step 1 for Placement Stitch Outline for all Parts.

3. Place both of your ear fabrics right sides together and lay over placement line. Stitch step to stitch together.
4. Place both of your Limb fabrics right sides together and over the placement lines. Stitch together.
5. Place your Tail fabrics right sides together and over the placement lines. Stitch together.

TIP: *If you know you want to use all the same fabric except for the Inner ear .. cut your main fabric (e.g. the gray minky) to the size of your hoop ... then all you will need to add is a square large enough for your Kitty's inner ears in cotton! Saves so much time too!*

6. Remove from hoop, remove stabilizer, and trim with 1/8" seams. Snip seams along curve to make the curves pop after turning. Turn everything, a paintbrush helps push out the curves. Loosely stuff the limbs. ***Only stuff limbs slightly if you over stuff they could get caught on your embroidery foot during final stages of design we don't want to waste all that hard work!!!**

Do NOT stuff your tail

For the 4x4 – You don't need to stuff the limbs, if you choose too, use the smallest amount .. only enough to 'puff' them up ☺ it will make sewing over them a lot easier! I recommend Hemostats!

7. For **Pleated Ears** - Take one of your ears, lay it flat on the table with the inner ear facing up. Pinch the middle of the ear in making a couple of pleats and pass your needle and thread through them to hold them in place (about 1/8 inch from the edge). Once happy with your ear, tie off. Repeat for the other ear so you have a matching ones. (see photo)

Or

..... **Flat Ears** (See little white cat) super easy especially for smaller hoop sizes!

Body-

1 St: 455 Light Gray	2 St: 442 Light Pink	3 St: 219 Light Gray	4 St: 550 Blaze Medium	5 St: 107 Light Gray	6 St: 255 Light Purple
7 St: 289 Gold/Yellow	8 St: 435 Green	9 St: 334 Gold/Yellow	10 St: 100 Blaze Medium	11 St: 46 Light Gray	12 St: 105 Green
13 St: 271 Orange	14 St: 37 Dark Yellow	15 St: 30 Light Blue	16 St: 35 Blaze Medium	17 St: 34 Dark Yellow	18 St: 49 Light Blue
19 St: 44 Dark Yellow	20 St: 40 Light Blue	21 St: 1154 Light Purple	22 St: 25 Light Blue		

1. Hoop Stabilizer, I used tear away in this project, but cutaway/poly mesh can also be used and run Step 1 ... The placement line.
2. Place one piece of body fabric on stabilizer right side up centered in hoop. If using loopy fabrics or fur this is where you want to add your Water Soluable Stabilizer to prevent your embroidery foot from getting caught. Run your Step 2, tacking down your main body fabric.

3. Run placement line for your belly.
4. Place your Fabric over placement line and tack down **If doing the Diamond stitch version, trim fabric as close as possible without snipping the tack down stitches. Then run the next step for the Diamond Stitch. If using the Straight Stitch , Always back your cotton with Heat and Bond and cut 1/4inch from the stitches. You can iron that on to felt for even more added stability.**
No Diamond Stitch for the 4x4 I am afraid, please use the straight stitch & a non fraying material e.g. felt or minky or back your cotton with Heat n Bond

***** This is where you would add a monogram to the tummy *****

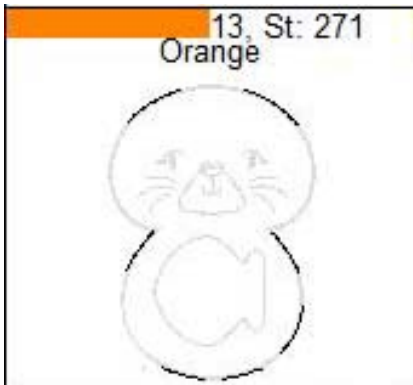

5. Run placement line for your face.
6. Place your Felt over placement line and tack down.
7. Trim around the face.

8. Stitch the details on the face.

TIP: Always pick a high contrasting color thread for your face so they show up against the skin tone fabric ☺

TIP: A layer of Water Soluble helps to get a lovely smooth finish to your face details

9. Run step for placement lines for the limbs, ears, and tail. I would do this in a different color so you can see where the placement line is. *If you use thick minky it can be very hard to see!*

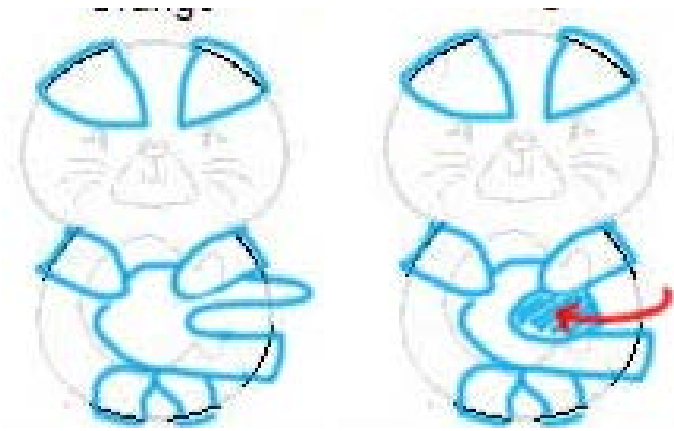

10. Place legs, arms, tail and ears over each placement lines and tack down one by one going in a counter clockwise rotation starting with the bottom left leg.

TIP: *Use painters tape to stop them from wiggling around.*

TIP: *Slow your machine down if you are using thicker fabrics or when attaching limbs and ears etc*

TIP: *If you use thick or loopy fabrics use a layer of Water Soluble Stabilizer over the main body before you start attaching the limbs to stop your embroidery foot getting caught! Simply remove it after all of your limbs are attached ☺*

Depending on your machines model some larger hooped machines read this step differently. And will run the placement line followed by the tack down line for each limb speratly in a anti clock wise direction.

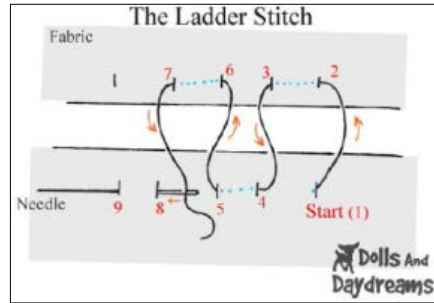

**** This is what your finished limb attachment will look like****

11. Make sure that all of the limbs, ears, **and Tail** are out of the way of the side seams, a few pins/tape can help with the tail ;) I like to fold it up over itself into the middle of the body ☺ Remember the angle you place it at will dictate how high the tail will be on your kitty after turning!
12. Lay remaining body piece of fabric over hoop right side down and run Second to last Step to sew it in place.
13. Skip the final step. This keeps your foot out of the way after you finish ;)
14. Remove from hoop and remove stabilizer.

15. Trim with 1/8" to 1/4" seam. Leave seam wider near the opening.
16. Clip seams around the curve.
17. Turn and carefully trim away the excess felt around the face if you didn't earlier.
18. Stuff and sew closed the side and tail with a hidden Ladder stitch. Go to my blog for a tutorial:
<http://dollsanddaydreams.blogspot.com/2010/11/how-to-close-softies-and-dolls-ladder.html>

Embellishments

You can add bows on head, buttons and bits of trim to the body! Please remember, anything that is detachable is **not recommended** on dolls **for children under the age of 3** as they pose a choking hazard.

Re-sizing/Altering the Design

Please use design files as sent, I cannot guarantee the quality of the design if you alter, resize, or reformat the design in any way.

For **Extra ITH Help** please go to my blog:

<http://dollsanddaydreams.blogspot.com/2014/02/embroidery-machine-in-hoop-toy-patterns.html>

Copyrighted Design

This is a **Copyright © 2015 Original Dolls and Daydreams®** design, you may **not** use (alter or adapt) any part of the design, body shape, tummy patch, limbs etc **to create a digital file to sell**.

This is not clip art. If another digital product (**digital file to sell**) is created using it in any form (alter or adapting - body/head shape, limbs, tummy patch etc) it is deemed a Derivative Work. This is a clear violation of the copyright.

If you intend to sell your finished Dolls & Softies

COTTAGE INDUSTRIES INFO – FOR EMBROIDERS AND SEWISTS

WHAT MUST I DO TO SELL FINISHED DOLLS?

There is NO LIMIT to the number of dolls and/or softies you can make, list and sell as long as:

1. Each person or cottage industry must purchase each pattern from Dolls and Daydreams for each different doll design. Simply put, a pattern or element of a pattern may not be shared.
2. Each person making the doll/softie requires their own purchased pattern. For example, if you are a cottage industry and have 3 people making the ballerina doll for your shop, you would need to purchase the ballerina pattern 3 times (for each person). This is required even if the 3 people only make a portion of the doll.
3. Internet shops: For a finished doll/softie or item adapted from a Dolls and Daydreams design that is to be sold, auctioned, entered/given in a contest, given for charity in the public domain (on the Internet, e.g. Etsy, Facebook, Made It, Felt, Art Fire, Big Cartel, etc.), each item must be credited as being made from a Dolls and Daydreams pattern, and include a direct link. For personal use or as a gift, this is not required.

This shall be done as part of the item listing in the description or details, and state: “Made from an Original Dolls and Daydreams® Pattern” (no variations in wording). You must also include a link to at least one of the following URLs:

- <http://DollsAndDaydreams.com/>
- <http://DollsAndDaydreams.etsy.com/>
- <https://www.facebook.com/dollsanddaydreams> - You can create a direct link to my Fan Page by 'liking' my page and then using the @ symbol before you type “DollsAndDaydreams”. You'll see a drop down menu - simply click on me and it's done!

Feel free to contact dollsanddaydreams.mgmt@gmail.com with questions or for help with your listing.

4. Brick and Mortar shops: For a finished doll/softie or item adapted from a Dolls and Daydreams design that is to be sold, auctioned, entered/given in a contest, given for charity at a physical location, e.g. “brick and mortar” shop, craft fairs, markets, stalls, shows, fundraisers, churches, etc.), each item must be credited as being made from a Dolls and Daydreams pattern. This shall be done on the physical sales tag and state: “Made from an Original Dolls and Daydreams Pattern” (no variations in wording). For personal use or as a gift, this is not required.
5. The items must be handmade. In other words, those that purchase my patterns are granted a non-exclusive limited license, subject to the terms of this Cottage Industries Info document, to make, list and sell items made from the purchased patterns, so long as the items are not mass produced, wherein mass produced is defined as, but not limited to, manufacturing large quantities of items in assembly line form; multiple workers creating individual items in parallel in order to produce large quantities of items; or the equivalent thereof.

MAY I MAKE ALTERATIONS TO THE PATTERNS?

Alterations to purchased patterns used to make dolls/softies for personal use or as a gift is allowed.

You may alter your purchased pattern to make dolls/softies you sell as detailed below, however, you must comply with the terms of the WHAT MUST I DO TO SELL FINISHED DOLLS? Section.

ACCEPTABLE Alterations include:

- Changing the hair style or face
- Reducing or increasing the pattern/doll and softie size
- Mixing the pattern pieces from one purchased Dolls And Daydreams pattern with another Dolls And Daydreams, e.g. limbs of one pattern, body of another, etc.

UNACCEPTABLE Alterations include:

- Trying to replicate my designs using one pattern, e.g. purchasing a lamb pattern and turning it into a Teddy or a Doll.
- Turning my designs into an embroidery or applique pattern.
- Modifying a digitized embroidery machine file for resale

Please be aware a Derivative Work is a work that is based on (derived from) another work; for example a painting based on a photograph, a collage, a musical work based on an existing piece or samples, a screenplay based on a book. Legally only the copyright owner has the right to authorize alterations, adaptations or reproductions of their original work - this includes the making of a derivative work.

Any doll or softie made with alterations from my original, copyrighted pattern is considered Derivative Work, and thus you must comply with the terms of the WHAT MUST I DO TO SELL? Section when listing and selling that item. The Acceptable Alterations apply only to sale of a finished doll/softie. In no way does it apply to alteration of a design and sale of the pattern.

OTHER IMPORTANT INFO FOR COTTAGE INDUSTRIES

Dolls and Daydreams respects the rights and abilities of other talented pattern designers and makers, and we hope you will do the same. **All patterns, designs, websites, photos/images and language/wording are original work and protected by US & International copyright law. In addition, Dolls and Daydreams® is a registered trademark (US & International).** As a result, others are **prohibited** from:

- Selling or distributing (electronically or in print) any Dolls and Daydreams pattern or digital file without prior written consent.
- Altering a design in any way and selling the pattern or digitized embroidery machine file as original work.
- Copying and/or using any photo/image from a Dolls and Daydreams pattern, website, blog, or social media without giving Dolls and Daydreams credit via a direct link. The Dolls and Daydreams logo/watermark shall not be removed.
- Using the trademarked name "Dolls and Daydreams" in any product title, description, tag, or listing without prior written consent. The only permitted use is in order to comply with the terms of the WHAT MUST I DO TO SELL? Section when listing and selling an item.
- Using any photo/image of a finished doll made from a Dolls and Daydreams pattern for any purpose other than publicizing and advertising the sale of the finished doll.
- Photos/images of the finished doll may not be reproduced in any fashion (digitizing, appliques, iron-ons, clip art, scrapbooking, etc.), without the prior written consent.

- Featuring a Dolls and Daydreams pattern as any part of group instruction, class, workshop, video or online tutorial, explicitly or implicitly, without prior written consent.
- “Unlocking” any PDF pattern. All patterns are locked by a security password to guarantee the file is secure and virus/corruption-free, and ensure the contents are not copied or altered.

SOCIAL MEDIA SHARING

Photos/images MAY be used on your blog or social media site as long as the Dolls and Daydreams logo/watermark is NOT removed, and you have included a direct link. (See WHAT MUST I DO TO SELL FINISHED DOLLS? Section #3 on how to properly add a direct link).

Thank you for your compliance with these Policies.

Please feel free to contact us directly with any questions or concerns related to our Policies: dollsanddaydreams.mgmt@gmail.com

*** * * UPDATES TO POLICIES PAGE * * ***

We reserve the right to update or amend this Policies page at any time without prior notice. Your use of any pattern following any such change constitutes your agreement to follow and be bound by the terms of the updated Policies page as changed. For this reason, we encourage you to review the Policies page regularly from our website <http://DollsAndDaydreams.com/>
